Respectfully,

S. H. BACKUS,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine Hospital Service.

MEXICO.

Report from Tampico—Sanitary conditions and mortality statistics.

TAMPICO, MEXICO, *June 23, 1902.*

SIR: I have the honor to transmit herewith abstract of bills of health issued at this port during the week ended June 21, 1902. During the same period there were recorded in the office of the juez civil a total of 15 deaths, as follows: Malaria, 4; disease of the gastro-intestinal tract, 3; tuberculosis, 2; pneumonia, 3; cardiac disease, 1; aneurism, 1, and infiltration of urine, 1.

There has been considerable rain during the past few days, probably the beginning of the wet season. The outlying portions of the city being rather low, barely above sea level, have been converted into puddles of varying dimensions. It is expected that the mosquito will take advantage of this opportunity to multiply its kind. The temperature, in the shade during the day has varied from 26° to 28° C.; otherwise, the sanitary condition of the port remains unchanged.

Respectfully,

JOS. GOLDBERGER,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.*
